Microfilm Scanner Provides Performance and Value

The ScanPro1000 utilizes cutting-edge digital technologies to bring you an exceptionally compact microfilm viewer/scanner/printer that takes up about as much room on your desktop as two sheets of letter paper. The ScanPro 1000 is easy-to-use and provides powerful features for working with all of your information stored on microfilm and micro opaques.

View All the Information Stored on Microforms

The ScanPro1000 makes it easy-to-view all the information stored on microfilm and micro opaques. The featured optical 7X to 54X zoom lens means you don't have to stop your look-ups to change lenses. The many other standard features like automatic focus, exposure control, and optical image rotation means that you can complete your look-ups and research quickly and efficiently.

Easy to View, Scan, and Print

View the information that you have stored on your microfilm and micro opaques right on your PC monitor, with live, real-time viewing. When you locate the information that you want, you can complete a high resolution scan in only one second with just "a single click". You can send these scans directly to a printer connected to the computer, to a networked computer, or save on your computer. And, using the included software, you can annotate, network, e-mail, save to other media, right from your PC.

Fiche/Aperture Card Film Carrier

What people are saying about the ScanPro...

"The ScanPro is a compact, solidly built, professional looking microfilm scanner. It is a fine addition to my research! It was easy to unpack and set-up, and I was scanning my microfilm in less than an hour. The software is very user friendly."

- O. Pat Vermillion - Petroleum Geologist, Plant City, FL

"I really like this machine...(it is) a wonderful blend of technologies in a practical easy to use format."

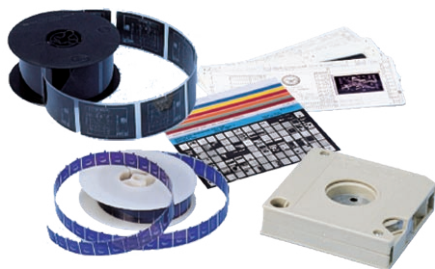

- Adams County Library - E Stephen, Thornton, CO

"It is working its little butt off, just a fabulous machine".

- MyCensuses Genealogy - G Beavington, British Columbia, Canada

Microfilm Carriers for All Film Formats

Microfilm carriers are available for handling fiche, aperture cards, jackets, 16 and 35mm roll film, cartridge film, and micro opaques. These carriers are built for public uses application and provide robust operation and feature ball bearing guides to provide exceptional film positioning control. You can select manual or motorized film carriers for roll film applications. Or, you can select combination film carriers for applications that have multiple film formats. You can also select carriers that will work with the ScanPro 1000 micro opaque option.

Film types

You can choose combination carriers that conveniently work with multiple film formats without having to be removed from the ScanPro when changing film types, ideal for demanding public use applications.

Easy-to-Use, Economical to Operate

The ScanPro 1000 is the reliable, compact desktop viewer, scanner, printer for all of your information stored on microfilm and micro opaques and it uses less power than a 60 watt light bulb.

ScanPro 1000 Product Information

TYPE:

Desktop, Compact Digital Microfilm Scanner

TYPE OF FILM:

*Microfiche, jackets, aperture cards
16mm & 35mm roll film open spool
16mm cartridge film (3M)
Micro opaques (optional)*

SCREEN SIZE:
