

DR7080-C

- Ultra fast, universal A3 flatbed scanner
- 70ppm for colour and black & white documents
- High quality 3-line CCD sensor
- 24-bit colour, 256 levels of greyscale levels, 600dpi
- ADF with inclined-plane separating mechanism
- Powerful CapturePerfect software

DR-7080C

Speed up your workflow with this compact, universal A3 document scanner. The DR-7080C features superior speed and unsurpassed quality for scanning both colour and black and white documents perfectly.

Rapid Colour Scanning

With the same impressive scanning speed of 70ppm for both colour and black and white documents (A4/landscape/200dpi), the dynamic DR-7080C provides the perfect way to get through more work in far less time. Duplex scanning in colour is equally rapid, at 36ipm (images per minute).

Continuous High Quality

Despite its high speed, the DR-7080C produces unsurpassed quality scanning, giving you the very best of both worlds. By adapting a 3-line CCD sensor, it provides continuous tone quality scanning. 24-bit colour and 256 levels of greyscale make this model highly suitable for scanning all types of documents. The image output resolution ranges from 100 dpi up to 600 dpi.

Fast, Reliable ADF Feeding

An inclined-plane separating mechanism is built into the scanner. This means that when the ADF (Automatic Document Feeder) is used there is smooth and rapid document feeding - with a pad separation mechanism virtually eliminating any risk of double sheet feeding. Furthermore, with flatbed functionality, books, bound documents and fragile or damaged paper can be scanned with ease.

Easy And Efficient Operation

A clear and intuitive control panel ensures exceptional ease of use for all operations. Routine job processes - such as scan to PC, scan to mail, scan to print and scan/run application - can be pre-registered and carried out directly from the control panel. The DR-7080C is equally easy to install, thanks to its "plug and scan" simplicity.

Compact Design, High Durability, Low Maintenance

Intelligently designed to save space and with a remarkably small footprint, this compact scanner fits neatly on your desktop or wherever required in the workplace. Plus Canon has built the DR-7080C for heavy-duty durability, with minimum maintenance. You can depend on maximum uptime throughout the lifetime of the product and profit from highly reliable scanning on a constant basis - while getting a real return on your investment.

Powerful Software For Enhanced Productivity

Powerful software brings you the versatility, ease and efficiency you need for extensive applications. The many benefits of CapturePerfect 2.0 include Scan to Mail, PC and Print as well as 90 Degree Auto Rotation. While wide-ranging ISIS/TWAIN driver advantages include MultiStreamT scanning and Book & Calendar duplex scanning.
